AcuDC 210/220 Series DC Power Meter

INTRODUCTION

AcuDC 210/220 series DC power meter can be used for monitoring and controlling in DC systems. These meters can measure a wide range of parameters such as voltage, current, power and energy. There are digital inputs for switch monitoring and relay outputs for remote controlling as well as an over-range alarming feature for voltage and current. Large signals, such as current and voltage can be converted to smaller signals using AO output. All data in the meter is accessible via RS485 using open Modbus RTU protocol.

APPLICATIONS

- Solar and wind energy systems
- Industrial control systems
- DC energy management systems
- Large UPS systems

FEATURES

- DC power system metering
- Monitor and control power switches
- Alarming and analog output
- Standard DIN sizing (96x48mm) allows for easy panel installation
- Can be used in SCADA, PLC systems
- Large character LCD display with vivid blue backlight
- Wide operation temperature range
